

# PEKTOS AG

## Mission Statement

### Quality & Food Safety Policy

PEKTOS AG purchases raw materials like food fibers from selected suppliers and refines these in carefully selected Co-manufacturing companies.

The employees mentioned below include all those involved in the processing. In addition, we execute customer orders in-house at our filling plant.

Our quality policy is market and customer oriented. We understand it as the fulfilment of high customer requirements, while we want to achieve that our products are superior to the competition.

All our employees strive to ensure permanently high product quality in the interest of our customers. We carry out training and audits to support our employees and the management and guarantee this.

Our understanding and awareness of quality, as well as the attitude of all employees towards quality, are prerequisites for the satisfaction of our customers, for a long-term business relationship with our customers and thus, for the lasting success of PEKTOS AG.

The definition and assurance of quality are carried out according to economic principles and required quality at corresponding costs.

In addition to economic thinking and for the benefit of cost saving the company PEKTOS AG wants to contribute its fair share to the environment. Every employee is aware of the energy, water and waste production and consumption during their working steps and promotes the reduction of the demand.

The management defines our quality policy. The management is committed to consistently applying and continuously improving the quality management system.
